Preliminary plans toward the erection at Elephant Butte dam of power plants for generating electricity, to be used in the Mosilia and Rio Grande valleys, were discussed. Wednesday morning at a joint meeting of officers or the Mesilia Valley Water Users' and the Elephant Butte Water Users' and the Elephant Butte Water Users' associations.

Current will be secured from the motive power produced by the water Falling over the dam.

May Require \$2,000,000.

It is estimated that the project involves an expenditure of from one to two million deliars. Members of both water users' organizations are hopeful of securing from the government the sum of money necessary to make the project materialize.

Weinredday's meeting was held in the office of Felix Martinez. Present were seven members of the board of directors of the Elephant Butte Water. On to Chicago Trip.

Metaker on Advertising.

Mr. Metaker, advertising manager for the Popular dry goods store, delivered the principal address to lise visio on the value of advertising and the necessity for advertising El Paso. He said:

Development of Advertising.

Men not very old have witnessed the entire development of modern advertising from being an antrust-worthy instrument of quacks to its place as the engine send steam in the conduct and expansion of lustiness.

This mation has reached a point where only a small fraction of the people are unable to read. The American people are quick to learn and to use what they learn.

This mental activity demands a large supply of literature and that demand has been supplied by the thousands of publications that are now in circulation. These are the reasons why advertising has found its greatest and most rapid development in the United States.

Creating a Bemssd.

"Advertising is that subtle, inde-

est and most rapid development in the United States.

Creating a Demand.

"Advertising is that subtle, indefinable, but powerful force whereby the advertiser creates a demand for a given article in the minds of a great many people, or arouses the demand that is already there in latent form.

"A few years ago there was not a single bank advertisement to be found in Birminsham papers, but today, there are eight banks there each using a minimum space of 500 inches monthly. And so it has been all ever the country. They are recognizing the power and value of publicity.

Churches as Advertisers.

"The most progressive churches in Amserica have commenced to use newspaper display advertising, and certainly as meritorious an Institution as the church should not hesitate to use paid for publicity to interest the public in Interest."

Any advertising proposition that is

ig has been able to make them peranent. It will always require more
everising than the profits justify to
eep a poor article on the market.

Says "Advertise El Paso."

Thave been in El Paso only a short
me, but durins that those I have
ermed certain impressions that are
sitly different from the ideas I had
El Paso when I was some thousand
two thousand miles away. The
rat time that El Paso was very
recibly brought to my mind was
out a year abo when I read in the
ricous publications of the country
hat thus very club was doing at the
attendard advertising convention at
wonto.

Surely El Paso deserves to be betradvertised away from bome. This

ter advertised away from home. This city deserves to have the truth told about its most progressive institutions, about its wonderful business advantances, about its opportunities for investments, about its most ideal climate and its husling, thriving, prosperous and hospital people.

And among those align and comforts for expectant mothers is the well known. "Mother's Friend."

This is an external application to enable the abdominal muscles to become more pliant, to expand naturally without undue pain from the strain upon cords and ligaments.

Applied as directed upon those muscles involved it soothes the fine network of nerves with which all the muscles are supplied. Thus a great share of the pains so much dreaded may be avoided and the period of expectancy passed in comfort.

There is no question but what such relief has a marked influence upon the general health of the mother.

In a little book nost by rail much useful information is given to inexperienced mothers. It tells how to use "Mother's Friend" and how to avoid exking breasts. It has been prepared in our laboratory for over forty years and is known favorably to meet druggists everywhere. Get a bottle to-day and write for book to Brasifield Regulator Ca. 708 Lamar Bibe.
